STATEMENT OF HARDSHIP

CV19-105

Chapter 3307 of the Columbus Zoning Code

Section 3307.10 Variances by City Council

- A. Permit a variance in the yard, height, or parking requirements of any district only in conjunction with a change in zoning or a use variance and only where there are unusual and practical difficulties or unusual hardships in the carrying out of the zoning district provisions due to an irregular shape of lot, topography, or other conditions, providing such variance will not seriously affect any adjoining property or the general welfare.
- B. Permit a use of the property not permitted by the Zoning District established on the property if such use will not adversely affect the surrounding property or surrounding neighborhood and if Council is satisfied that the granting of such variance will alleviate some hardship or difficulty which warrants a variance from the Comprehensive Plan.
- Before authorizing any variance from the Zoning Code in a specific case, City Council shall first determine that such variance will not impair an adequate supply of light and air to the adjacent property, unreasonably increase the congestion of public streets, increase the danger of fires, endanger the public safety, unreasonably diminish or impair the public health, safety, comfort, morals, or welfare of the inhabitants of the City of Columbus.
- In granting a variance pursuant to this section, Council may impose such requirements and conditions regarding the location, character, duration, and other features of the variance proposal as Council deems necessary to carry out the intent and purpose of this Zoning Code and to otherwise safeguard the public safety and welfare

List all sections of Code to be varied and explain your reasoning as to why this request should be granted.

PLEASE NOTE: It is the applicant's responsibility to identify all variances required for the project. If any necessary variances are discovered after your application is approved, a new application will be required.

I have read the foregoing and believe my application for relief from the requirements of the Zoning Code contains the necessary hardship, will not adversely affect surrounding property owners and will comply with the variance(s) requested as detailed below (use separate page if needed or desired):

See attached sheet for list of variances and statement of hardship.

Signature of Applicant

1420 S 4th Street
Statement of Hardship

The property at 1420 S 4th Street is a vacant corner lot in an urban area. The majority of the lots in this area encompass the full depth of 129'-0" from 4th Street to the rear alley. However, this property is only afforded a portion of that overall depth (89'-0"). The limitation of the lot depth places a hardship on this property.

With the reduced lot depth, the existing lot size (4,062 sf) ended up being 67% smaller than the required zoning lot size of 6,000 sf. The lot width is also narrower (45.65') than the required lot width of 50'. With the property being a corner lot, the 30' vision clearance came into play minimizing the buildable area even more.

With the three hardships listed above, the area remaining to construct a single-family dwelling was extremely compromised.

The request to reduce the front building line from 10' minimum to 8'-8" allows for an increase in functionality of the interior spaces. The adjacent building to the north has a setback of 0'-0". The building across Jenkins has a setback of 8'-0". The 8'-8" front line will not impact the urban streetscape since the two adjacent structures sit closer to the street than the proposed structure.

The request to reduce the side building line on a corner lot from 9'-2" to 5'-0" is again to increase the functionality of the interior spaces. The building across Jenkins to the south sits at 0'-0". The 5'-0" side building line will allow for additional landscaping between the right-of-way and the structure compared to the previous structure located at this property which was a zero-lot line condition.

The remaining three variances (reducing rear yard from 1,015sf (25%) to 537sf (13%), increasing building coverage from 2,031sf (50%) to 2,266sf (56%), and reducing driveway vision clearance from 12' to 5') all stem from trying to create an adequate footprint to support the functioning spaces for a new single-family residence given the site constraints listed in the first paragraph.

CV19-105

1420 S 4th Street

List of Requested Variances

Request variance from Section 3332.05 (area district lot width) to allow for a lot of 45.65' in lieu of the required 50' width in zoning district R2F.

Request variance from Section 3332.14 (R-2F area district lot size) to allow for a lot of 4,062 sf in lieu of the required 6,000 sf.

Request variance from Section 3332.27 (rear yard) to reduce the required rear yard square footage from 1,015 sf (25%) to 537 sf (13%).

Request variance from Section 3332.18(D) (building coverage) to increase the allowable building coverage from 2,031 sf (50%) to 2,266 sf (56%).

Request variance from Section 3332.21 (front building line) to reduce the minimum frontage building line from 10'-0" to 8'-8".

Request variance from Section 3332.22 (side building line on corner lot) to reduce the minimum side street setback from 9'-2" (20% lot width) to 5'-0" (11% lot width).

Request variance from Section 3321.05 (driveway vision clearance) from 12' to 5'.
